

Intermediate Environmental Scientist – Permanent, Full-Time, Edmonton, Alberta

Spencer Environmental Management Services Ltd has an *immediate* opening for a highly motivated, versatile environmental scientist/ecologist to join our team.

Job Details:

- permanent, full-time (typically 40 hrs/wk with flexibility to respond to dynamic project needs); part-time arrangement may be considered
- based in Edmonton (required); some opportunity to WFH
- occasional, short-term travel to project sites throughout Alberta required
- start date to be negotiated with successful candidate
- compensation to be commensurate with candidate's experience and skills

Job duties and opportunities for growth include:

- undertake field assessments
- manage and analyse biophysical data, prepare technical reports and contribute to environmental/biophysical assessments
- assist with environmental permit acquisition
- assist with project management and client liaison

Qualifications:

- B.Sc. or M.Sc. in ecology, conservation biology, botany or related discipline, with at least 5 years of professional experience; equivalencies will be considered
- at least 2 years of consulting experience is preferred
- eligible to work in Canada (i.e., Canadian citizen, Canadian permanent resident)
- P.Biol. accreditation or eligibility to register as a P.Biol. in Alberta; B.I.T. may be considered
- eligible to hold a valid Class 5 driver's license, with no restrictions
- knowledgeable about Alberta landscapes and ecological regions
- experience working independently in field settings
- strong desire to contribute to science-based environmental management and successful project delivery as an integrated team member

Demonstrated skills/areas of excellence:

- plan and conduct field surveys for one or more of the following: vegetation, wildlife, wetlands
- acquisition of federal and provincial environmental permits
- preparation of environmental assessments
- technical report preparation
- strong interpersonal communication skills and ability to interact effectively with others, including scientists, regulators, engineers, construction personnel
- critical thinking, problem-solving, effective time management, responding to dynamic work conditions and hours
- wetland classification, delineation and assessment
